# Car Rental

## Problem statements

Find the best car for customers need

- customer should be able to search through available cars
- customer should be able to preorder car on a wanted date
- Admin Employee must have access to, remove, add, update cars, rent out cars, receive cars, as well as billing orders
- it-guy should be able to maintain, update, fix website
- Mechanic should be able to find the registered orders, state of car before and after rental as well as car informations
